

Anuj Sharma

Jaipur, Rajasthan, India | +91-7878424348 | anuj787842@gmail.com | linkedin.com/in/anuj-sharma-a8884a279

PROFESSIONAL SUMMARY

Data Enthusiast and intern candidate with hands-on experience in exploratory data analysis (EDA), data cleaning, and structured dataset management. Proficient in Python, SQL, MySQL, Pandas, NumPy, Power BI, and Excel. Skilled at transforming raw data into actionable insights and visual dashboards to support business decision-making. Strong communicator who presents findings clearly to both technical and non-technical stakeholders.

TECHNICAL SKILLS

Languages: Python, SQL

Databases: MySQL, PostgreSQL

Analysis: Exploratory Data Analysis (EDA), Data Cleaning, Data Wrangling, Statistical Analysis, Data Quality Analysis

Libraries: Pandas, NumPy, Matplotlib, Seaborn

Visualization: Power BI, Tableau (Basic), Excel (Pivot Tables, VLOOKUP, Charts), Google Sheets

Cloud & Tools: Google Cloud Platform (GCP), Git, Jupyter Notebook, Google Colab

INTERNSHIP EXPERIENCE

Vaishnav Technologies

May 2025 – Aug 2025

Data Science Intern

Jaipur, Rajasthan, India

- Performed end-to-end EDA on structured datasets using Python, Pandas, and NumPy to uncover patterns, trends, and data quality issues.
- Cleaned and preprocessed datasets by handling missing values, duplicate records, and outliers, improving data integrity for analytics and reporting.

Axis India Machine Learning

May 2024 – June 2024

Research & Development Intern

India

- Performed data validation, cleaning, and transformation using Python (Pandas, NumPy) to support ML research and experimentation workflows.
- Assisted in analysis and interpretation of experimental results to support ongoing research objectives.

PROJECTS

Fake News Detection System | *Python, NLP, Scikit-learn, Streamlit, TF-IDF*

- Built an ML-based web application to classify news articles as Real or Fake using Natural Language Processing.
- Trained and compared multiple models – Logistic Regression, Naive Bayes, and Random Forest – for optimal classification performance.
- Applied TF-IDF vectorization for feature extraction from raw news text data.
- Developed an interactive Streamlit interface providing real-time predictions with confidence scores.

Spam Mail Detection System | *Python, NLP, Scikit-learn*

- Built a spam email classification pipeline including text preprocessing and cleaning.
- Applied TF-IDF vectorization to convert text into numerical features.
- Trained and evaluated machine learning models for spam detection.

Job Data Pipeline Skill Demand Analysis | *Pipeline, Data Cleaning, SQL, Visualization*

- I built an end-to-end ETL pipeline where I extracted job data, cleaned and structured it using Pandas, stored it in a database, and analyzed skill demand using SQL and visualization.

EDUCATION

Poornima University

Jaipur, Rajasthan, India

B.Tech in Computer Science Engineering – AI & Data Science

2022 – 2026
